### Chromosomes of Jesus

Regarding God's willingness to heal, consider the following: By the very Spirit, Holy Spirit, of God, Jesus was born into this world with only 23 chromosomes; typically, humans have 46. Why were there only 23 chromosomes in Jesus? Because a male was not involved. God's Spirit, only, indwelt Jesus so it would not be tainted with humankind and carry on the sin nature of humankind after the fall of Adam. The concept of the foregoing defies natural human thought; but, because God was willing and able to show His supreme power over very life itself, would He not be willing and able to heal OUR mortal bodies? The very God of all, working through His Holy Spirit, raised Jesus from the dead even though Jesus' body was rotting for three days. Know what? IF the Spirit of God dwells in our mortal bodies He shall quicken, make alive, our mortal bodies. God is willing and able to even raise a rotting earthly body again to life, and He will do the same for us, if we can believe ask Him. Selah
